## Science

### Plants and Rocks & Minerals

With FCAT now over we can start to refocus on our science curriculum. In third grade we will continue our discovery of plants and the systems that help a plant live and grow; including the **roots, stem, leaves** and **flower**.

In fourth grade we will discuss rocks and minerals. We will start by comparing and contrasting different types of rocks and then learning about the 3 different types of rocks; **igneous, sedimentary, and metamorphic**.

## FCAT

All of our scholars did a tremendous job on the FCAT! The focus of the students was fantastic and I am very optimistic of what the scores will be. 😊 Great job Tigers!

## Social Studies

### State of the week

The time is finally here!! Students will start learning about the state of the week again starting this week! With this being said, students will also start having their weekly tests on Fridays. We will start back up with South Carolina.

### Report Cards

Report Cards will be going home this Friday, April 27. Please make sure to sign and return the slip on the bottom left of the report card.
